

A Rock Solid Foundation for Data Centers

Haworth's TecCrete® has 25 years of proven performance and is the strongest and most durable access flooring system in its class. It can be factory-finished with static dissipative or conductive laminate or vinyl designed for server intense environments and backed by a 3-year warranty. TecCrete lays a secure foundation for data centers that can easily change and adapt to new technologies while managing large volumes of data cables and cooling the space efficiently.
